

COMBINED TRANSPORT

COST-SAVING: Intermodal > Multimodal > Combined Transport

A combined transport periodically referred as a multimodal transport in which various strengths of different means of transport (air, ship and overland) are united and only a single document is needed to move goods across the entire route.

Skylink network offers combined transport solutions, including cost-cutting, optimization of transit times and reduced warehouse costs.

Skylink network, always recommend the mode of transport that will be the most advantageous option for You and Your business. We believe that it is by putting the Customer's well-being first that we have become a leader in the transport industry while setting new standards in it.

Specialized Services:

Skylink network combined transport services, reduces cargo handling charges, minimizes damage or loss and expands security by allowing the freight to be transported quicker.
