

VESSEL CHARTERING

VESSEL CHARTERING: integral to optimizing shipping cost

Vessel chartering services are essential to international trade and logistics because they give companies an adaptable and effective way to ship goods across oceans. In the marine sector, vessel chartering refers to the hiring of a ship or a designated cargo area for the movement of commodities. Many industries, such as manufacturing, agriculture, and energy, use this service to efficiently transfer vast amounts of commodities, completed goods, or raw materials.

Skylink act as collaborators between ship owners, operators, and cargo owners, either as acting as a charterer or broker. As an intermediary our vessel chartering services are essential for optimizing shipping expenses and guaranteeing on-time delivery. we take the responsibility of managing and overseeing the ocean transportation on behalf of our client whether shipping bulk commodities, containerized items, or customized cargoes, businesses can select vessels that meet the unique needs of their cargo.

Skylink offers a range of options when it comes to vessel chartering services such as TC/TCT/VC/BBC by facilitating it up till end through stand-alone freight solutions.
