FIRE PROTECTION INDUSTRY

PYRO-PROTECT LOGISTICS: Ensuring Timely Delivery

Fire protection equipment contains chemicals at very high pressure. Transporting them involves moving slowly and cushioning the extinguishers so there is no risk of explosion or accidentally activating the trigger mechanism. If shipping firm transporting fire protection equipment then it need to declared them as a dangerous goods because of their desperate property. And also it require careful planning to remove all the risk associated with these type of transportation.

Skylink affiliated with fire department, safety inspectors, environmental agencies, and emergency response team to minimize involved risk from entire shipping operation.

Skylink also underpin with experience team who are available 25/7 to assist you and to offer best possible solutions for your shipment.
