AEROSPACE LOGISTICS

AEROSPACE: Global & Advanced Solutions

A big challenge presented to aerospace logistics is having the right parts, at the right time, & at the right place – while addressing the usual concern of cost, speed and reliability. Aerospace industry needs a logistics partner that understand the details of shipments for Aircraft-On-Ground (AOG), Original Equipment Manufacturers (OEM) or Maintenance, Repair And Overhaul (MRO) – weather emergency maintenance, or for critical and routine operations.

At Skylink, our logistics professionals are trained as per industry standards, respecting the value of spare parts, engines and systems. We have worked in close cooperation with our global consultants, partners and customers to minimize the downtime for the safe transport of plane vital parts.

Skylink network offers a portfolio of aerospace logistic services based on strict quality, safety regulations, just-in-time processes, global procurement operations to optimize costs & performance commitments for requested parts and components.
